leadership plays a major role in everything that we do in life though effective leadership is a personal role that requires individual thinking and attainment one must make sure that it is focused on the overall success of the organization however there are other roles that are directly tied up in what we call leadership and some of the roles include self leading managing change empowering people leading by example delegating authority facilitating cooperation and building and leading a team leadership is not just power but for the most part it is about relationships leadership is also about one's power to reward and punish in a nondiscriminatory manner to have a certain style or persona that ensures people will support your implementation of goals for the success of the organization however at the end of the day you will never get there without first leading oneself to do the right thing in all of your endeavors one learns leadership by being a leader this cannot happen unless you have the proper skills visionary trustworthy inspirational etc because leaders must balance many roles to be successful however sometimes you need help to guide and remind you how to take a course of action this book serves as a sounding board to help guide you with its recording of best practices climb the ladder of leadership hired trainee mentor team lead supervisor manager and executive and let people know that you can successfully lead with every step you take

there are many competing ideas of how to be a good leader but the majority of them do not examine what is meant by leadership it is taken for granted that a good leader gets results and earns recognition for them which has produced a great deal of literature revealing the habits or traits

of good leaders there to be studied and emulated but each setting in which leadership takes place is different and it no more makes sense to think of leadership in terms of specific and universal traits than it would to ask a painter to fix a car instead the concept of leadership must be understood as contextual and therefore on display all around us it is not simply to be found in the boardroom of industrial giants or on the pages of fortune magazine it is to be found everywhere in every setting where an organised response perfectly satisfies an expressed wish it is good leadership that ensures your morning coffee is just as you expect it to be and that explains why contented employees show up to work on time even when the boss is away the study and therefore the development of leadership skills must start from an understanding of organisational purpose and from this study the function of leadership in context can be distilled and improved this book provides a template of general principles for understanding the role of leadership within an organisation allowing leaders to understand their own role without the need for psychology or acting classes with leadership placed in its proper perspective and the importance of organisational purpose asserted the book then guides the process of mapping out a leadership schematic specific to each organisation making clear how each role in the organisation relates to the overall purpose this schematic can then be used to clarify the role of individuals focus development and training and foster an environment in which initiative innovation and creative thinking can be brought to bear on the bottom line by spreading an understanding of the organisational purpose and allowing individuals properly to understand their relation to it and gain possession of the purpose the task of a leader is to increase the correlation between individual and group purpose in order to do this leaders need first to understand the organisation that they seek to lead grasping its core purpose and then nurture the living threads of leadership that bind it together to do this it is first necessary to dispense with the veneration of leaders and replace it with a clear understanding of and respect for leadership
